Mckein Tayag

iOS Engineer | Mobile Banking & Fintech | AI & R&D Enthusiast
Metro Manila, National Capital Region, Philippines

Summary

I've been passionate about coding since I was a kid, starting with simple HTML pages in Notepad and experimenting with Visual Basic. That early curiosity grew into a career where I design and develop high-performance mobile applications that solve real-world problems.

With 10+ years of experience, I've worked on iOS, Android, Salesforce, and AI-powered solutions. Currently, I help build secure and scalable mobile banking applications used by top financial institutions in Germany and Switzerland. My expertise spans from optimizing app performance to leading R&D efforts in emerging tech.

I love solving complex challenges, refining user experiences, and pushing the boundaries of what's possible in mobile development. Let's connect and discuss collaborations, tech trends, or exciting new projects!

Experience

Avaloq

Senior Software Engineer

November 2019 - Present (5 years 6 months)

Philippines

Developed and optimized mobile banking applications for top financial institutions across Germany, Switzerland, and the APAC region, ensuring high availability and security compliance with industry standards.

Implemented new features and resolved complex issues, improving app stability and user experience for clients in the European and APAC banking sectors.

Collaborated with cross-functional teams across different time zones, including developers, QA engineers, and business analysts, to align technical solutions with business needs.

Supported and mentored new hires, providing onboarding guidance, technical knowledge sharing, and best practices for Swift development and Agile methodologies.

Streamlined development and deployment processes, ensuring efficient delivery of mobile banking products to clients.

Cloud Employee

Mobile Developer

June 2015 - October 2019 (4 years 5 months)

Makati, Philippines

Redesigned and implemented a complete UI/UX overhaul for a client's mobile application, modernizing the interface and improving usability while ensuring seamless integration with the existing system.

Developed and maintained iOS and Android applications for various international clients, ensuring smooth functionality and consistent user experience.

Implemented new features tailored to client requirements, improving app usability and engagement.

Led API integrations for seamless third-party service connectivity, expanding app capabilities.

Collaborated with clients and stakeholders to gather requirements, provide technical recommendations, and ensure smooth feature rollouts.

p3ople4u

Senior IOS Developer

September 2014 - June 2015 (10 months)

Makati, Philippines

Developed core features for Cheers!, a startup social app that allowed users to connect and send virtual gifts, ensuring smooth functionality and engagement.

Researched and implemented new technologies, including PhoneGap and Telerik, to enhance cross-platform performance and reduce development time.

Led UI/UX improvements to refine user interactions, improving navigation and overall app usability.

Collaborated closely with designers and stakeholders to align app development with business goals and user needs.

Conducted R&D on emerging mobile technologies, identifying new opportunities for business expansion.

[24]7

Mobile Applications Engineer

January 2014 - August 2014 (8 months)

ncr - national capital region, philippines

Enhanced and maintained the company's desktop and mobile chat product, improving real-time communication performance for users.

Developed and integrated new features into the existing chat platform, increasing user engagement and responsiveness.

Worked with global teams to implement front-end solutions using HTML, CSS, jQuery, JavaScript, RequireJS, and Handlebars, ensuring cross-platform compatibility.

Optimized UI elements and workflows, enhancing the user experience across both mobile and desktop applications.

Collaborated with product managers and QA teams to troubleshoot and resolve issues efficiently, ensuring high system reliability.

Cloud Sherpas(formerly GlobalOne)

Salesforce/Mobile Developer

August 2010 - November 2013 (3 years 4 months)

Makati

Developed enterprise Salesforce applications for clients in insurance, pharmaceuticals, and healthcare, streamlining business processes and data management.

Built and maintained mobile applications powered by Salesforce, enabling businesses to access critical data and workflows on the go.

Performed large-scale data migration using Informatica, ensuring 100% data accuracy and system integrity during transitions.

Led research and development efforts to explore innovative Salesforce integrations and mobile solutions, identifying opportunities for business expansion.

Collaborated with cross-functional teams to design, develop, and deploy custom Salesforce solutions tailored to client needs.
